S2

Started on	Tuesday, 25 August 2026, 9:25 AM
State	Finished
Completed on	Tuesday, 25 August 2026, 9:26 AM
Time taken	1 min 24 secs
Marks	1.00/1.00
Grade	**10.00** out of 10.00 (**100**%)

Question 1 | Correct Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using the counter method.

```
void function (int n)
{
    int i= 1;
    int s =1;
    while(s <= n)
    {
         i++;
         s += i;
     }
}
```

Note: No need of counter increment for declarations and scanf() and count variable printf() statements.

Input:

A positive Integer n

Output:

Print the value of the counter variable

For example:

Input	Result
9	12

Answer: (penalty regime: 0 %)

Ace editor not ready. Perhaps reload page?

Falling back to raw text area.

```
#include <stdio.h>

void function(int n) {
    int count = 0;
    int i = 1;
    int s = 1;

    count++;       // i = 1
    count++;       // s = 1

    while (1) {
        count++;  // while condition
        if (s > n)
            break;

        i++;
        count++;
```

	Input	Expected	Got	
✔	9	12	12	✔
✔	4	9	9	✔

Passed all tests! ✔

Correct

Marks for this submission: 1.00/1.00.
